

## Worksheet B

Putting the solution into action:	Reviewing the outcome:
<p>What are you going to do?</p>	<p>How did it go?</p>
<p>When are you going to do it?</p>	<p>Has it solved the problem sufficiently?</p>
<p>Where are you going to do it?</p>	<p>If not go back to your list of ranked solutions on <b>Worksheet A</b> and put the next one into action, planning – on a new <b>Worksheet B</b> – what you are going to do and when you are going to do it.</p>

Is there anyone you need with you?

Are there any things you need to do first?

Is there anything that might get in the way of your plan?  
What can you do to overcome these obstacles?

If it went to plan and solved the problem, great! What have you learned from doing it that you can apply to the next practical problem that you have?
